

MIDAS # 5216

PARKER POND

JAY TWP. FRANKLIN CO. MAINE

AREA 128 ACRES

PARKER POND
(Parkis Pond or Mirror Lake)
Jay, Franklin County
U.S.G.S. Wilton, Maine (7½')

Fishes

Landlocked salmon	Chain pickerel
Rainbow smelt	Minnows
Largemouth bass	White sucker
White perch	Pumpkinseed sunfish
Yellow perch	American eel

Physical Characteristics

Area - 102 acres

Maximum depth - 26 feet

Temperatures:

Surface - 77°F

22 feet - 56°F

Principal fisheries: Largemouth bass, white perch, chain pickerel

Parker Pond is located north of Moose Hill. Two inlets enter the pond; James Brook at the north and an unnamed tributary at the south. The outlet, Little Norridgewock Stream, flows north into Wilson Stream. The shoreline is mostly undeveloped.

Water quality in Parker Pond is marginal for coldwater gamefish. Water temperatures reach critical levels during the warm summer months. Salmonid spawning and nursery habitat is limited, but landlocked salmon utilize the inlet to maintain low numbers. Bass, perch, and pickerel provide anglers with good opportunities year-round. The pond is not stocked.

Parker Pond is accessible via a gravel side road off the East Jay Road. The pond is open to fishing in both the summer and winter seasons under general law. See the lawbook for additional regulations.

Surveyed - August, 1950

Resurveyed - 1975
